

TS1500B POWER MISER SOLENOID

SPECIFICATIONS

- Operating Voltage:** 12 or 24 VDC
- Power:**
 - Primary Coil (Pull) – 170 Watts
 - Secondary Coil (Hold) – 7 Watts
- Timing:** Primary circuit on for 300 ms. & switching to secondary for continuous duty operation.
- Temperature Rating:** 130° C
- Life Expectancy:** 1 Million Cycles
- Dielectric Strength:** 1000 V RMS
- Holding Force:** 400 ounces with flat-faced plunger.

Other plunger configurations available.
